01

What you'll have at the end

By the end of this guide you will have:

- found the tools your plan includes and installed the ones you need;
- found your licence key and know how to keep it safe;
- activated a tool on a demo account and seen the activation counted in the app;
- released an activation you no longer need;
- on Hedge, sent your first custom build request.

What the toolkit is: terminal-side tools for MetaTrader 5, cTrader and TradingView that you install and run on your own platform: a copier Expert Advisor, four risk tools and three free indicators, all built in-house.

What it is not: the toolkit is separate from the hosted trade copier. The hosted relay runs on TradinSolutions' servers and needs nothing on your machine; toolkit tools run inside your own terminal,

so they only work while that terminal is open. None of the tools sets your rules for you, and none of them trades on its own judgement.

This guide covers getting, licensing and activating every tool. How each tool is attached and configured is in its own toolkit user guide, named in the table below.

02

Before you start

WHAT'S IN THE TOOLKIT

TOOL	TYPE	PLATFORM	PLAN	FULL GUIDE
MultiTP Ladder	Risk tool	MT5	Starter	MultiTP Ladder user guide
DisciplineGuard Pro	Risk tool	MT5, cTrader	Starter	DisciplineGuard Pro user guide
PnL Manager Pro	Risk tool	MT5, cTrader	Pro	PnL Manager Pro user guide
Propfirm Rules Manager	Risk tool	MT5, cTrader	Pro	Propfirm Rules Manager user guide
Autopilot MT5 Trade Copier	Copier EA	MT5	Pro and Hedge	Autopilot MT5 Trade Copier user guide
Multi-EMA Suite	Indicator	MT5 (MQL5 Market), TradingView, cTrader	Free (cTrader build: paid plans)	Multi-EMA Suite user guide
Trend Heatmap	Indicator	MT5 (MQL5 Market), TradingView	Free	Trend Heatmap user guide
Session Killzone	Indicator	MT5 (MQL5 Market), TradingView	Free	Session Killzone user guide

Each card shows its plan as a badge: Free, Starter, Pro or Hedge. If your plan does not cover a tool, its card reads **INCLUDED WITH** and the plan that does. Autopilot MT5 needs a Pro or Hedge key: the EA checks it with tradinsolutions.com and refuses a Free or Starter key, and its chart shows **UNLICENSED** until a valid key is entered.

The three free indicators open from the MQL5 Market on MT5 and need no licence key. Several of the paid tools are also sold on the MQL5 Market. If you already own one there, that copy is separate from your TradinSolutions plan.

WHAT EACH PLAN INCLUDES

	FREE	STARTER €69	PRO €129	HEDGE €199
MT4/MT5 accounts (copying + journal)	0	2	5	10
Futures logins (Tradovate + NinjaTrader together)	0	2	5	10
Futures sub-accounts	—	5 in total	10 per login	120 in total
cTrader logins	0	3	5	10
cTrader sub-accounts	—	10 in total	20 in total	unlimited
Signal channels (TradingView, Telegram, Discord share one count)	0	1	3	8
Risk tools	—	MultiTP Ladder, DisciplineGuard Pro	all four (+ PnL Manager Pro, Propfirm Rules Manager)	everything
Toolkit activations (one pool across MT5, cTrader, TradingView, per trading account)	**none**	3	5	10 (+ SEATS, up to 5 more)
Free indicators	✓	✓	✓	✓
Support	standard	standard	24H PRIORITY	24H PRIORITY
Custom tools / month	—	—	—	1 custom trading tool (EA) + 2 custom risk-management tools; more for an extra fee

Every plan includes the free indicators. Upgrading raises your activation cap automatically, with no extra steps.

WHAT TO HAVE READY

- A member account at app.tradinsolutions.com.
- The platform installed on your computer (MetaTrader 5 or cTrader) or a TradingView account.
- A **demo account** on that platform. Test every tool on a demo before it touches a live or funded account.
- If you trade a prop-firm account, check that your firm allows EAs.

03

Step-by-step: get a tool and find your licence key

1. Sign in at app.tradinsolutions.com and open **Toolkit**.
2. Find the tool and choose your platform on its card:
   - **A licensed tool on MT5 or cTrader:** download the file (the `.ex5` for MT5, the `.algo` for cTrader).
   - **A free indicator on MT5:** click **MT5**, then **Continue to MQL5**, and install it from the Market.
   - **TradingView:** see "On TradingView" below.
3. Find the **YOUR LICENCE KEY** panel on the Toolkit page. The key is masked; click **SHOW** to reveal it, or **COPY** to copy it.

You get **one licence key per tier, not one per tool**. The same key unlocks every licensed tool in your plan, on MT5 and cTrader. The free indicators need no key.

> **Important:** Treat your licence key like a password. It is tied to your account and must not be shared. Sharing it breaks the Licence Agreement and can get the key revoked.

04

Step-by-step: activate a tool on a platform account

Activation happens the first time a tool checks your key on a given trading account. You do not press an activate button in the app.

On MetaTrader 5

1. In MT5, open **File → Open Data Folder** and copy the `.ex5` into **MQL5\Experts**.
2. In the Navigator, right-click **Expert Advisors** and click **Refresh**. No compiling is needed.
3. Allow the licence check. Open **Tools → Options → Expert Advisors**, tick **Allow WebRequest**, and add both `https://tradinsolutions.com` and `https://www.tradinsolutions.com`.
4. Turn on **Algo Trading** in the toolbar.
5. Drag the tool onto a chart. In **Toolkit → YOUR LICENCE KEY**, click **COPY**, then paste the key into the **LicenseKey** input.
6. Click OK. The tool verifies the key, and that trading account uses one activation.

The key is saved per chart, so save the inputs as a preset to reuse them.

On cTrader

1. Download the `.algo` file and double-click it. It installs into cTrader Automate.
2. Add an instance of it on a chart, and grant the access rights it asks for.
3. Paste your licence key into the **License Key** parameter and press **Start**.

The key is saved per bot, so save the parameters as a preset. On cTrader a tool runs as a cBot rather than an EA, volume is set in units or lots, and you press **Start** instead of turning on Algo Trading.

On TradingView

TradingView builds are invite-only and are granted to your TradingView username.

1. On the tool's card in **Toolkit**, click **TradingView**.
2. Enter your username in **TRADINGVIEW USERNAME** and click **Request access**. Access is granted within 24 hours of your request.
3. Once access is granted, open **Indicators** → **Invite-only** in TradingView and add the script to your chart.
4. Set alerts from the **Alert** dialog.

Then go to the tool's own guide

Every setting and its default, and how to attach and configure each tool, are in its user guide: **MultiTP Ladder**, **DisciplineGuard Pro**, **PnL Manager Pro**, **Propfirm Rules Manager**, **Autopilot MT5 Trade Copier**, **Multi-EMA Suite**, **Trend Heatmap** and **Session Killzone**.

05

Managing your activations

An **activation** is one trading account a licensed tool runs on. Each one uses one activation from your plan's pool (Starter 3, Pro 5, Hedge 10), shared across MT5, cTrader and TradingView. Later checks on the same account use nothing more; only a new trading account uses a new activation. The Free plan has no activations.

The **YOUR LICENCE KEY** panel on the Toolkit page shows **ACTIVATIONS** as used out of allowed (for example 2 / 5), with **FREE SEATS** and **EXPIRES** beside it.

WHEN YOU REACH YOUR LIMIT

Trying to activate on a new account while you are at your cap is blocked outright. You have two ways forward:

1. **Free up an activation you no longer use.** Click **RELEASE** in the **YOUR LICENCE KEY** panel on the Toolkit page. The slot is freed immediately.
2. **Raise the cap.** Upgrade your plan, or on Hedge add extra activations with **+ SEATS**.

> **Important:** Demo accounts count as activations too. Release a demo you have finished testing on before you move a tool to your live account.

EXTRA ACTIVATIONS (HEDGE ONLY)

On Hedge, click **+ SEATS** in the **YOUR LICENCE KEY** panel and choose from 1 to 5 extra activations. Each extra activation is charged once, and a licence can have at most 5 extra in its lifetime.

IF YOUR SUBSCRIPTION LAPSES

Your licence key has a **48-hour grace period** after a subscription lapses. After that, the key stops verifying.

06

Custom builds (Hedge)

When a rule cannot be expressed with the standard settings, Hedge includes bespoke work in MQL5, written by the people who wrote the toolkit.

- **Each month:** 1 custom trading tool (an EA) plus 2 custom risk-management tools, indicators or utilities. The Custom Tools page shows these as **EA BUILDS** and **INDICATORS & TOOLS**.
- **Extra work:** available for an extra fee, quoted in Custom Tools.
- **The usual requests:** a rule the standard risk settings cannot express, an integration with a platform not yet supported, or reporting shaped to a specific firm's requirements.

Bespoke builds are scoped as work, not sold as a feature. The first step is always a conversation about whether what you need already exists, because often it does.

Request a build

1. Open **Custom Tools** in the member app.
2. Describe the rule or behaviour you need, the platform, and the account type it will run on.
3. Submit the request. You get a reply within two business days, and the conversation about scope starts from there.

> **Note:** Before you pay for extra custom work, read the Refund Policy linked in the site footer. Episode 11 covers billing.

07

Words you'll see

TERM	MEANING
Toolkit	The tools and indicators page in the member app.
Licence key	One key per tier that unlocks every licensed tool in your plan. Masked until you click SHOW.
Activation	One trading account a licensed tool runs on.
RELEASE	Frees an activation so it can be used on another account.
+ SEATS	Adds 1 to 5 extra activations on Hedge, charged once each.
Connection	One broker login linked for the hosted copier or journal. A different allowance from activations.

TERM	MEANING
ACTIVATIONS x / y	Activations used out of your plan's allowance.
Grace period	48 hours after a subscription lapses before the key stops verifying.
Custom build	Bespoke MQL5 work on Hedge, scoped as a job.
Provider / Follower	The source account and a destination account in a copier. The Autopilot EA inputs may still show these as MASTER and SLAVE.

08

Worked example: moving from demo to three funded accounts

Say you are on Pro with 5 activations, and you want PnL Manager Pro on three funded MT5 accounts.

1. You download PnL Manager Pro from **Toolkit** and click **COPY** in the **YOUR LICENCE KEY** panel.
2. You attach it to your MT5 demo and paste the key into **LicenseKey**. The panel now shows **ACTIVATIONS 1 / 5**.
3. You run it on the demo across several sessions, including a volatile one, and adjust the settings using the PnL Manager Pro user guide.
4. You attach it to your three funded accounts with the same key. The panel shows **ACTIVATIONS 4 / 5**.
5. Later you add MultiTP Ladder on two more MT5 accounts. The first attaches and the panel shows **5 / 5**; the second is blocked, because you are at your cap.
6. You release the demo's activation with **RELEASE**. The slot frees at once and the second account activates.

If you needed a sixth and seventh account for tools, the options would be to release another account or move to Hedge, which has a higher cap and extra seats.

09

Troubleshooting

WHAT YOU SEE	LIKELY REASON	WHAT TO DO
Activation blocked on a new account	You are at your activation cap	Use **RELEASE** on the Toolkit page to free an unused one, or upgrade.
Cap reached sooner than expected	Demo accounts count as activations	Release demos you have finished with.
The licence check fails on MT5	WebRequest is not allowed for the licence server	Add both `https://tradinsolutions.com` and `https://www.tradinsolutions.com` under **Tools** → **Options** → **Expert Advisors**.

WHAT YOU SEE	LIKELY REASON	WHAT TO DO
A paid tool stopped working after a payment problem	The 48-hour grace period has ended	Update your payment method or resubscribe (Episode 11).
A card reads INCLUDED WITH and a plan name	Your plan does not include that tool	Check which plan includes it on the pricing page.
The tool attaches but does nothing	Algo Trading is off (MT5) or the cBot has not been started (cTrader)	Turn on Algo Trading, or press **Start**.
The key is rejected	A typing or paste error, or the key was revoked	Copy it again with **COPY** in the **YOUR LICENCE KEY** panel. If it still fails, contact support.

10

FAQ

Do I need a separate key for each tool? No. One licence key per tier unlocks every licensed tool in your plan, on MT5 and cTrader. The free indicators need no key.

Is there a TradingView build of Propfirm Rules Manager? No. Propfirm Rules Manager runs on MT5 and cTrader only.

Does reattaching a tool on the same account use another activation? No. Only a new trading account uses a new activation.

Is the Autopilot EA the same as the hosted copier? No. Both copy trades between accounts, but Autopilot runs inside your MetaTrader 5 terminal (usually on a VPS). The hosted relay runs on TradinSolutions' servers, covers MT4, MT5, cTrader, Tradovate and NinjaTrader, and takes Telegram, Discord and TradingView signals. Both come with Pro and Hedge: the EA needs a Pro or Hedge key, and the hosted copier is part of those plans.

Do the risk tools work on prop-firm accounts? They run on your account like any Expert Advisor. Set them to your firm's exact rules and check that your firm allows EAs. No tool can make a challenge outcome certain; the tools enforce the limits you set.

What if a tool I need does not exist? On Hedge, request a custom build. On other plans, contact support to ask whether it already exists.
